

Recipe

Mint Chocolate Cookie
Ice Cream Cake

Ingredients List: * Dark Chocolate Cake Mix/ prepared
* 1/2 Gal. Mint Chocolate Ice Cream
* 1 Pkg. Oreo Mint Crème Cookies

Directions: Prepare cake according to package directions. Allow each cake layer to cool, or freeze, in your freezer between layers of wax paper until you are ready to build your ice cream cake. Soften ice cream for thirty minutes. Place softened ice cream in your stand mixer and use your flat beater to slowly blend ice cream. While your ice cream is softening, crush your Oreo Mint Crème Cookie by hand and set aside. Place your first chocolate cake layer on the bottom of your serving platter, add a layer of crushed Oreo Mint Crème Cookie, pipe or gently spread a generous layer of ice cream. Repeat steps once more and top with remaining layer of cake. Wrap cake with wax paper/plastic wrap. Allow cake to freeze for a minimum of four hours before serving. Thaw for five minutes before serving if you froze your cake overnight or longer. No need to thaw if you served within hours after building/freezing. Garnish the top of your cake with whipped cream and remaining cookie chunks.
